

## AREEBA KHALIQ

areeba.khaliq@gmail.com • +92-349-654-7946 • Lahore, Pakistan • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

### PROFESSIONAL SUMMARY

---

Computer Science student (graduating May 2026) with a strong foundation in data analysis, machine learning and problem-solving. I have used Python, SQL and various statistical tools across academic projects and hackathons, and build end-to-end solutions. Comfortable operating in fast-paced environments, having delivered full-stack AI projects under 48-hour hackathons and curious about finding better ways to approach complex problems. Looking to apply analytical skills and collaborative mindset towards building impactful solutions.

### EDUCATION

---

#### University of the Punjab, Lahore

2022 - 2026

Bachelor of Science - Computer Science

7th Semester GPA: 3.71 / 4.0

*Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Systems, Software Engineering, Computer Networks, Object-Oriented Programming*

### EXPERIENCE

---

#### Machine Learning Engineer: FYP Research Project

Oct 2025 – Apr 2026

*University of the Punjab, Lahore - Final Year Project*

- Designed and trained CNN-based deep learning models using TensorFlow and OpenCV to detect and classify acne from facial images into mild, moderate, and severe severity categories
- Implemented image preprocessing pipelines and data augmentation strategies, improving model generalization and classification accuracy across diverse skin tone datasets
- Developed backend inference logic to generate personalized treatment recommendations based on severity classification output
- Evaluated model performance using precision, recall, F1-score and confusion matrix analysis and iteratively improved accuracy across severity classes

#### Full-Stack Developer: Hackathon Projects (lablab.ai & Devpost)

Apr 2025

*Remote - Competitive Hackathons*

- Identified a gap in AI-assisted job applications and built ResuMate, a resume builder using Next.js and Grok AI, from idea to deployed product on Vercel and recognized as a finalist in the lablab.ai hackathon
- Developed AgentForce, an intelligent IT support assistant integrating Salesforce Agentforce with FastAPI backend, deployed on Render for production access
- Coordinated across design, backend and deployment within 48-hour deadlines and communicated technical decisions to keep both projects on track for submission

### PROJECTS

---

#### Heart Disease Prediction Model

May 2025

*Python · Scikit-learn · Pandas · NumPy · Matplotlib*

- Achieved 98.54% prediction accuracy by implementing and benchmarking 4 ML algorithms (Decision Tree, Logistic Regression, KNN, SVM) on the UCI Heart Disease dataset (303 patient records)
- Performed end-to-end data preprocessing, feature engineering, and model evaluation using cross-validation and confusion matrices and interpreted which features strongly predicted heart disease risk

## Hostel Management System

Nov 2024 - Dec 2024

Python · Django · SQLite3 · HTML · CSS

- Built a full-stack web application for hostel operations covering room allocation, fee management, and maintenance tracking for multiple users
- Implemented role-based user authentication using Django's built-in security framework with relational database schema in SQLite3

## Bus Ticket Booking System

Nov 2025

Java · HTML · CSS · JavaScript

- Developed a Java-based system to manage bus schedules, routes, and passenger booking records with structured data organization and efficient record storage

## TECHNICAL SKILLS

---

**Languages:** Python, Java, JavaScript, C, C++, HTML, CSS, Kotlin

**Frameworks & Libraries:** React, Next.js, Django, FastAPI, Scikit-learn, TensorFlow, OpenCV, Pandas, NumPy, Matplotlib

**Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Linux, Apache Tomcat, Vercel, Render

**Databases:** SQLite3, MySQL

## CERTIFICATIONS & ACHIEVEMENTS

---

[CS50x Puzzle Day - Harvard University](#)

2026 & 2025

[Meta Hacker Cup - Competitive Programming](#)

2025

lablab.ai Hackathon - ResuMate Project (Finalist)

Apr 2025

Devpost Hackathon - AgentForce Project

Apr 2025

CodeBees 2.0 - Programming Competition

2024
