EDUCATION

University of the Punjab, Lahore

Lahore, Punjab, Pakistan

BS Computer Science 6th Semester

Expected Graduation, June 2026

SUMMARY

Motivated and detail-oriented Computer Science student. Passionate about building scalable software and solving real-world problems through code. Learning to develop web applications, contributing to team projects, and using tools like Git, Python and JavaScript. Eager to apply technical skills and fast learning abilities in a dynamic tech environment.

PROJECTS

Hostel Management System

November 2024-December 2024

Tools: Python, Django, SQLite3, HTML, CSS

A web application for managing hostel operations including room allocation, fee management, and maintenance tracking.

- Developed the front-end using HTML and CSS
- Implemented user authentication and authorization using Django
- Managed the backend with Django and SQLite3

ResuMate - Hackathon Project for lablab.ai

April 2025

Tools: HTML, CSS, Next.js, Grok AI, vercel

A web application that allows users to create resumes with AI assistance, featuring sections for personal info, achievements, work experience, education and skills.

- Developed the front-end using HTML and CSS, used Next.js for user interface
- Managed the backend and AI integrated features using Grok AI
- Deployed on Vercel (<https://resume-creators.vercel.app/>)

AgentForce - Hackathon Project for Devpost

April 2025

Tools: HTML, CSS, Javascript, FastAPI, Render

An intelligent web-based AI assistant support agent build using Salesforce Agentforce and Fast API designed to streamline internal IT support operations.

- Developed the front-end using HTML, CSS and Javascript
- Managed the backend with FastAPI and salesforce agentforce Integration
- Deployed on Render (<https://agentforce-devpost.onrender.com/>)

Heart Disease Predication Model

Tools: Python, Scikit-learn, Pandas, NumPy, Matplotlib

May 2025

- Developed heart disease model using UCI Heart Disease dataset with 303 patient records
- Implemented and compared 4 ML algorithms: Decision Tree, Logistic Regression, K-Nearest Neighbors and Support Vector Machine
- Performed data preprocessing, feature engineering and model evaluation to achieve optimal prediction accuracy of 98.54%
- Analyzed model performance using accuracy metrics, confusion matrices and cross-validation techniques

SKILLS

Languages and Frameworks: C, C++, Python(Scikit-learn, Pandas, NumPy, Matplotlib), Java, SQL, HTML, CSS, JavaScript, React, Next JS, APIs

Tools: Visual Studio Code, Linux, Google Colab, Jupyter Notebook, Git, GitHub, Apache Tomcat

Soft Skills: Strong problem-solving, Algorithm Design, Creativity, Complexity Analysis, Communication skills

Certifications: CS50x Puzzle Day 2025 by Harvard, CodeBees 2.0
