EDUCATION

University of the Punjab, Lahore

Expected May 2026

Bachelor of Science - Computer Science

GPA: 3.47 / 4.0

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Systems, Software Engineering, Computer Networks, Object-Oriented Programming

EXPERIENCE

FYP Research Project: AcneAI for Acne Detection and Analysis

Oct 2025 - Apr 2026

University of the Punjab, Lahore - Final Year Project

- Designed and trained CNN-based deep learning models using TensorFlow and OpenCV to detect and classify acne from facial images into mild, moderate, and severe severity categories
- Implemented image preprocessing pipelines and data augmentation strategies, improving model generalization and classification accuracy across diverse skin tone datasets
- Developed backend inference logic to generate personalized treatment recommendations based on severity classification output

Full-Stack Developer: Hackathon Projects (lablab.ai & Devpost)

Apr 2025

Remote - Competitive Hackathons

- Built ResuMate, an AI-powered resume builder using Next.js and Grok AI, deployed on Vercel; received recognition in the lablab.ai hackathon competition
- Developed AgentForce, an intelligent IT support assistant integrating Salesforce Agentforce with FastAPI backend, deployed on Render for production access

PROJECTS

Heart Disease Prediction Model

May 2025

Python · Scikit-learn · Pandas · NumPy · Matplotlib

- Achieved 98.54% prediction accuracy by implementing and benchmarking 4 ML algorithms (Decision Tree, Logistic Regression, KNN, SVM) on the UCI Heart Disease dataset (303 patient records)

Hostel Management System

Nov 2024 - Dec 2024

Python · Django · SQLite3 · HTML · CSS

- Full-stack operations platform for room allocation, fee management, and maintenance tracking with role-based auth and normalised relational DB schema

Bus Ticket Booking System

Nov 2025

Java · HTML · CSS · JavaScript

- Developed a Java-based system to manage bus schedules, routes, and passenger booking records with structured data organization and efficient record storage

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, SQL, HTML, CSS

Frameworks & Libraries: React, Next.js, Django, FastAPI, Scikit-learn, TensorFlow, OpenCV, Pandas, NumPy

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Linux, Apache Tomcat, Vercel

CERTIFICATIONS & ACHIEVEMENTS

CS50x Puzzle Day - Harvard University, Meta Hacker Cup - Competitive Programming, CodeBees 2.0
